

FGK-1-5

Firestorm series

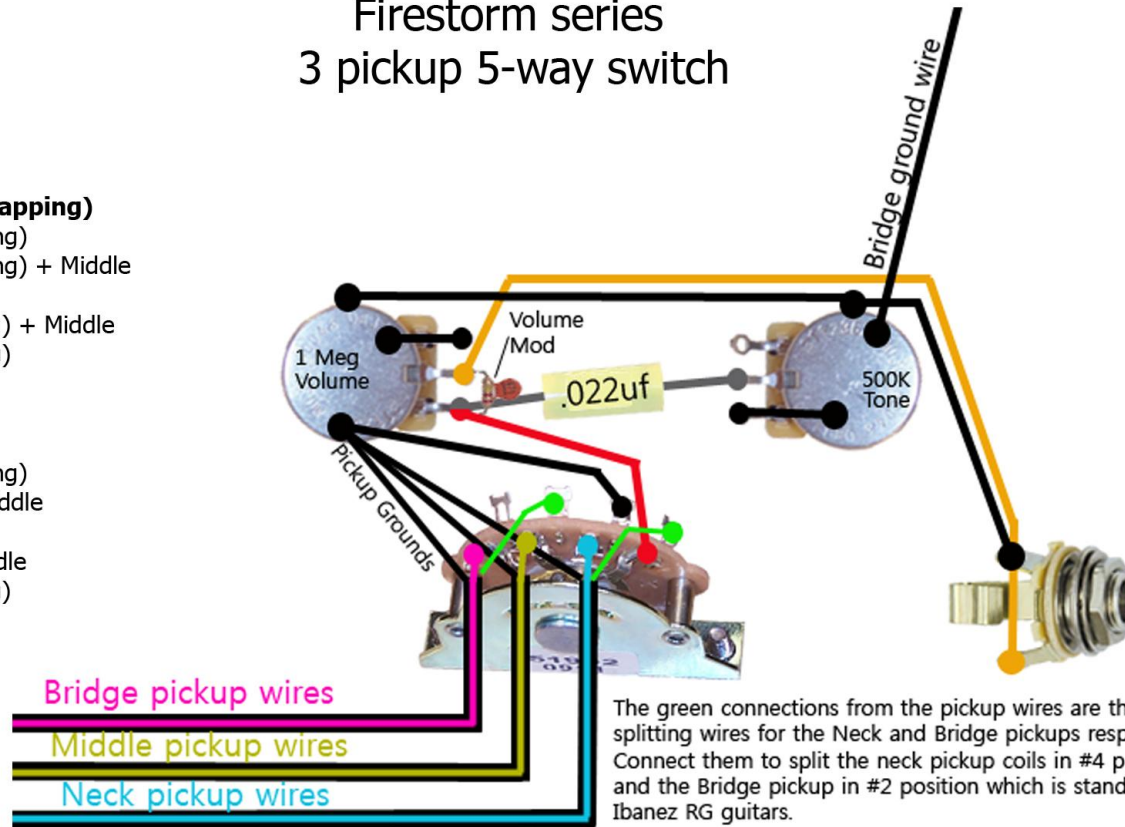

3 pickup 5-way switch

Standard (no coil tapping)

1. Bridge (Humbucking)
2. Bridge (Humbucking) + Middle
3. Middle
4. Neck (Humbucking) + Middle
5. Neck (Humbucking)

Coil Tapping

1. Bridge (Humbucking)
2. Bridge (Split) + Middle
3. Middle
4. Neck (Split) + Middle
5. Neck (Humbucking)

The green connections from the pickup wires are the coil splitting wires for the Neck and Bridge pickups respectively. Connect them to split the neck pickup coils in #4 position and the Bridge pickup in #2 position which is standard for Ibanez RG guitars.

This wiring uses a 1 Meg volume pot to make the pickups as bright as they can be and a .022uf high quality metal film capacitors for a brighter, more modern tone.
